

DL-WIFI 60 plus

- app controlled audio streams
- powerful sound
- up to 8 speakers manageable

The DL-WIFI 60 plus is the perfect choice for an impressive wireless sound! We designed the DL-WIFI 60 to be a true wireless speaker because WiFi provides a higher bandwidth and a superior audio quality to bluetooth. Not to mention a far better range, unobstructed by furniture or walls. This speaker takes wireless sound to new heights!

The 60W active powered stereo ceiling speaker pair (Class D amplifier, 2x30 W) offers a full and rich sound, while you use your WiFi network to stream music from a mobile device or local network. Simply use the ic audio WIFI-Control 60 app to connect and control one or multiple DL-WIFI speakers in any room of your installation. Of course you can set up personal favourites and playlists.

The app can be downloaded for free on the App Store and Google Play Store. You can use the music services Spotify, TuneIN, iHeartRadio and TIDAL. WIFI-Control 60 supports AirPlay®, so you can wirelessly stream any audio from your iPhone, iPad, iPod touch directly to the speaker.

Another option is to use the Windows Media Player in your network for audio playback. If desired you can simply expand your DL-WIFI speaker network up to 8 speakers (4 pairs of speakers) to boost the sound performance. If your WiFi network is unstable, just use the local LAN socket or the RCA line in jacks.

The high performance 2-way speaker itself has a sophisticated softclipping function which guarantees a smooth and balanced sound even at a very high volume. The frameless ceiling speaker offers also a magnetic grille for an unobtrusive installation. The power supply unit for the speaker pair is included in the

Be part of the digital audio revolution with fantastic wireless sound!

Supported operating systems:

Android 5.0 up to 8.x, IOS up to version 12.4.5, Windows 8.1 or higher
